(72) Inventors; and

(75) Inventors/Applicants (*for US only*): **BULLINGTON, Jeff** [US/US]; 348 Grey Owl Run, Chuluota, FL 32766 (US). **STOLTZ, Richard** [US/US]; 3321 Swanson Drive, Plano, TX 75025 (US). **SIDERS, Craig, W.** [US/US]; 1556 South Lyons Court, Oviedo, FL 32765

(88) Date of publication of the international search report:

2 June 2005

*For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*

(54) Title: OPTICAL AMPLIFIER WITH SPACED THIN SLABS

(57) Abstract: The high-power-optical-amplifier of the present invention uses a number of spaced, thin slabs (e.g., disc-shaped doped-slabs that are stacked, with a space between discs), aligned to give an amplifier both with a high active cross-section and a very high surface area to volume ratio. More specifically, the present invention provides several methods that include the steps of aligning at least two or four slabs having a thickness dimension of less than one centimeter, substantially parallel to, and spaced from adjacent slabs, wherein the slab surfaces are rendered essentially non-reflective, optically pumping the slabs and passing an input beam through the surfaces wherein the beam is optically amplified in the slabs, and wherein the input beam is of an eye-safe wavelength.
